#1 IN THE WORLD

SILCA

Silca is the global brand of reference for the production of keys and the production of professional and industrial machines dedicated to key duplication. Silca has been responsible for the most important technological evolutions in key duplication such as the first electronic key cutting machine capable of copying keys by code. Silca machines

are born from a long tradition, from a know-how recognized at a global level and from the expertise and passion of engineers who understand keys in every detail.

QUALITY AND CERTIFICATIONS

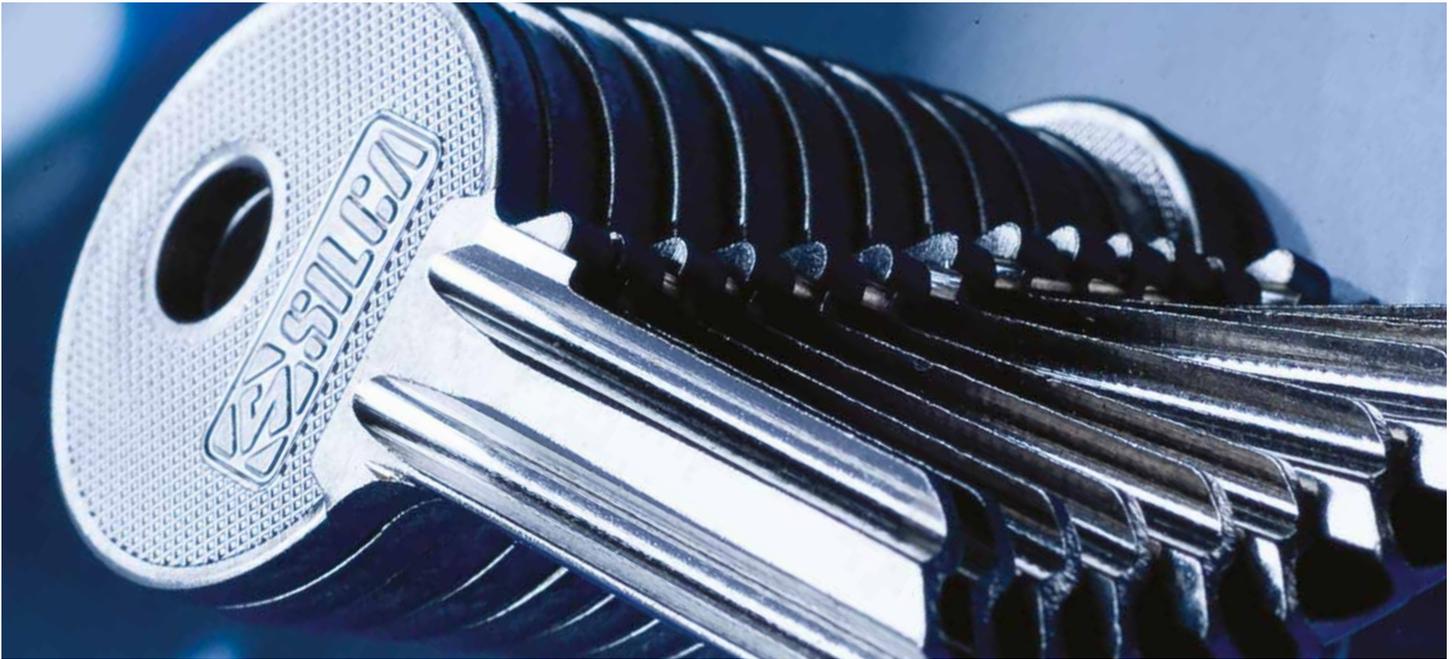

Product quality is fundamental to Silca and we invest continuously to guarantee a level of quality that is both independently certified and designed

to last. The recognition received is the result of Silca's commitment to quality and sustainability.

Silca holds the following standards:

- ISO 9001:2008,
- IATF 16949:2016 (Automotive),
- UNI EN ISO14001:04 (EMS),
- BS-OHSAS 18001:07

THE KEY CUTTING MACHINE MOST SUITABLE FOR YOU

This catalogue presents every key cutting machine, both mechanical and electronic, in a standard, easy to read format that gives the machine's key technical and functional characteristics to help you to choose the machine best suited to your needs.

For each machine, in addition to the technical characteristics, the main accessories are also detailed.

COMPARISON TABLES

These sections developed by Silca experts, allow you to quickly compare the different models in the same family to understand the differences and decide which is the right machine for your business.

The comprehensive final summary table also allows you to see the whole range, across model families, by the types of keys cut.

OPTIONAL ACCESSORIES

The same passion and attention to detail dedicated to the design and creation of every key cutting machine is also applied to the range of Silca accessories.

Clamps, jaws, feeders: every component is studied based on the structure of the machine for which it will be used.

ORIGINAL SPARE PARTS

Original Silca spare parts are made from the highest quali-

ty materials, assembled with maximum care and precision tested.

They are made to ensure that optimum performance and precision levels last over time.

ORIGINAL COSUMABLES

Silca offers a vast range of original consumables like cutters, tracers and brushes.

All Silca consumables conform to the same guaranteed high quality levels that Silca delivers with key cutting machines.

GUARANTEED COMPONENTS

Original Silca components are designed and produced to respect the requirements of the CE standard. In cases of repair or substitution the CE standard is only guaranteed if original Silca spare parts are used. Silca guarantees to supply parts for 7 years after the discontinuation of a product.

SILCA KEY PROGRAMS PRO

is the software platform developed by Silca to cut keys with the electronic key cutting machines using the original dimensions set by lock manufacturers, ensuring high quality and precise results. SKP has a modular structure to support different customer needs.

SILCA SOFTWARE INTERFACE (SSI)

Silca Software Interface is a software module that allows you to import and manage .dat and

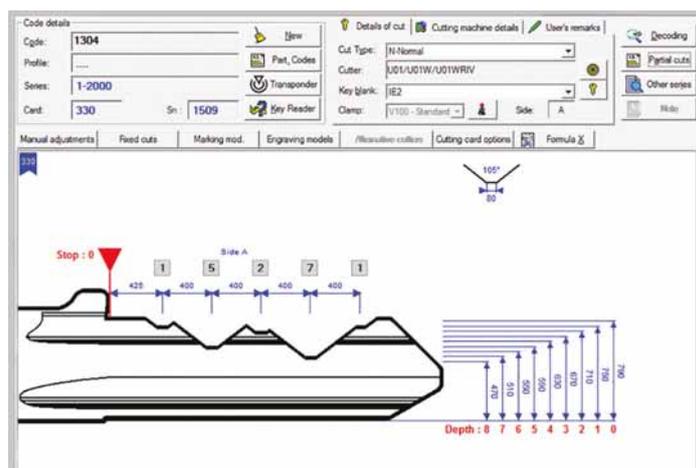

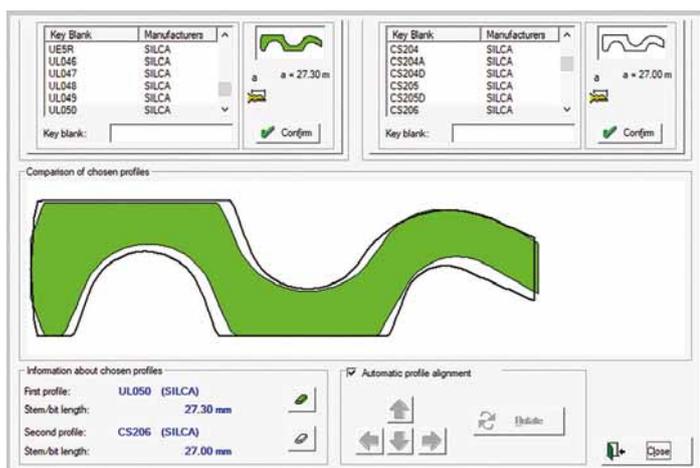

.xml data typically used in the production of master key systems. The management of job queues optimizes the phases of key duplication and engraving; useful during installations.

CODE MAKER

Code Maker is an SKP module for creating key cutting cards not yet present in the Silca database. This function allows you to create cards for flat, dimple, bit, double bit and pump keys.

SILCA OEM CLIENT

Silca OEM Client (SOC) is a software functionality that allows authorized locksmiths to copy Mottura®, Evva® and Assa® keys. The function ensures full traceability of the duplicates, which are archived and tallied. The OEM transmits the encrypted cutting parameters directly to the machine, guaranteeing the highest level of security in the key duplication service.

MYSILCA APP

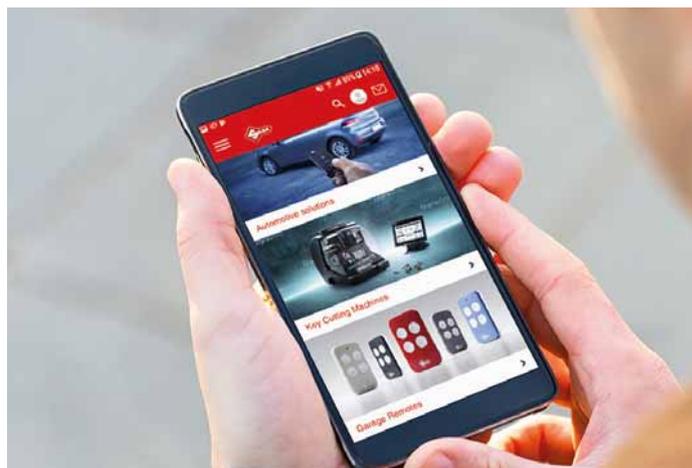

Every day Silca stands by your side with digital solutions that help you identify and use our products. MySilca is the app that provides free and prompt access to the entire range of Silca products, with real time updates on the latest keys, key cutting machines, automotive solutions and remotes. Essential support material such as technical data, brochures, photos and videos are also available 24/7, so you can al-

ways keep our expertise close at hand. MySilca App is optimized for smartphone and tablet, is compatible with Android and iOS systems, and is available in six languages (English, Italian, German, French, Spanish, Portuguese).

BARCODE ORDERING

With MySilca App placing orders is fast and easy. With the 'Barcode Ordering' function you can scan the barcodes of the keys and accessories you

want to purchase and place your order with a simple click. You can contact Silca, your agent or your distributor. You can scan the barcodes directly from the boxes of the products or from the Barcode catalogues available from your Silca representative.

THE CATALOGUE

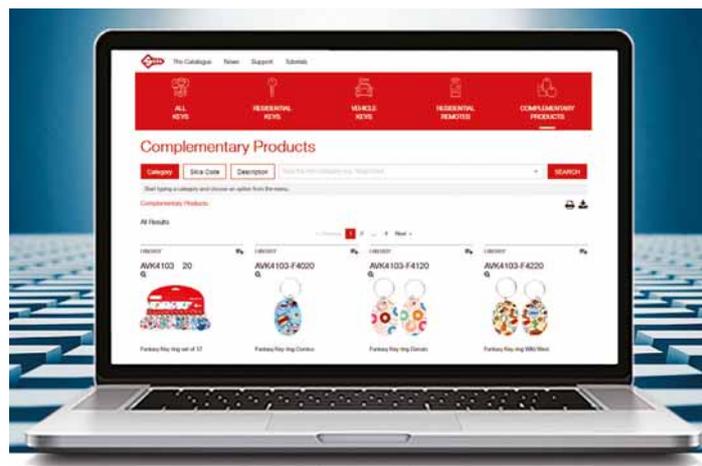

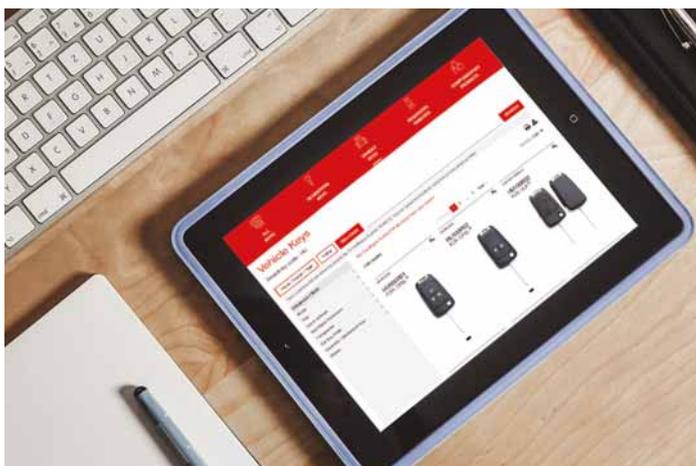

The Catalogue is the largest residential and automotive key database worldwide. The breadth and quality of the information available make it the essential tool to find the key you need. You can search residential keys by original make; or by make, model and year if you're browsing automotive keys. Additional filters can be applied to improve the results. You can also create personalized collections and print out

key tags for your display, customizing them with information such as hook position and price.

REMOTES AND COMPLEMENTARY PRODUCTS SEARCH

The Catalogue includes the assortment of Silca complementary products, such as key rings, engravable key tags, carabiners and snap hooks, together with the range of original residential remotes compatible with Silca Air4. Video tutorials guiding you through the programming pro-

cedures are available for numerous remote models. Registration is free at thecatalogue.silca.biz.

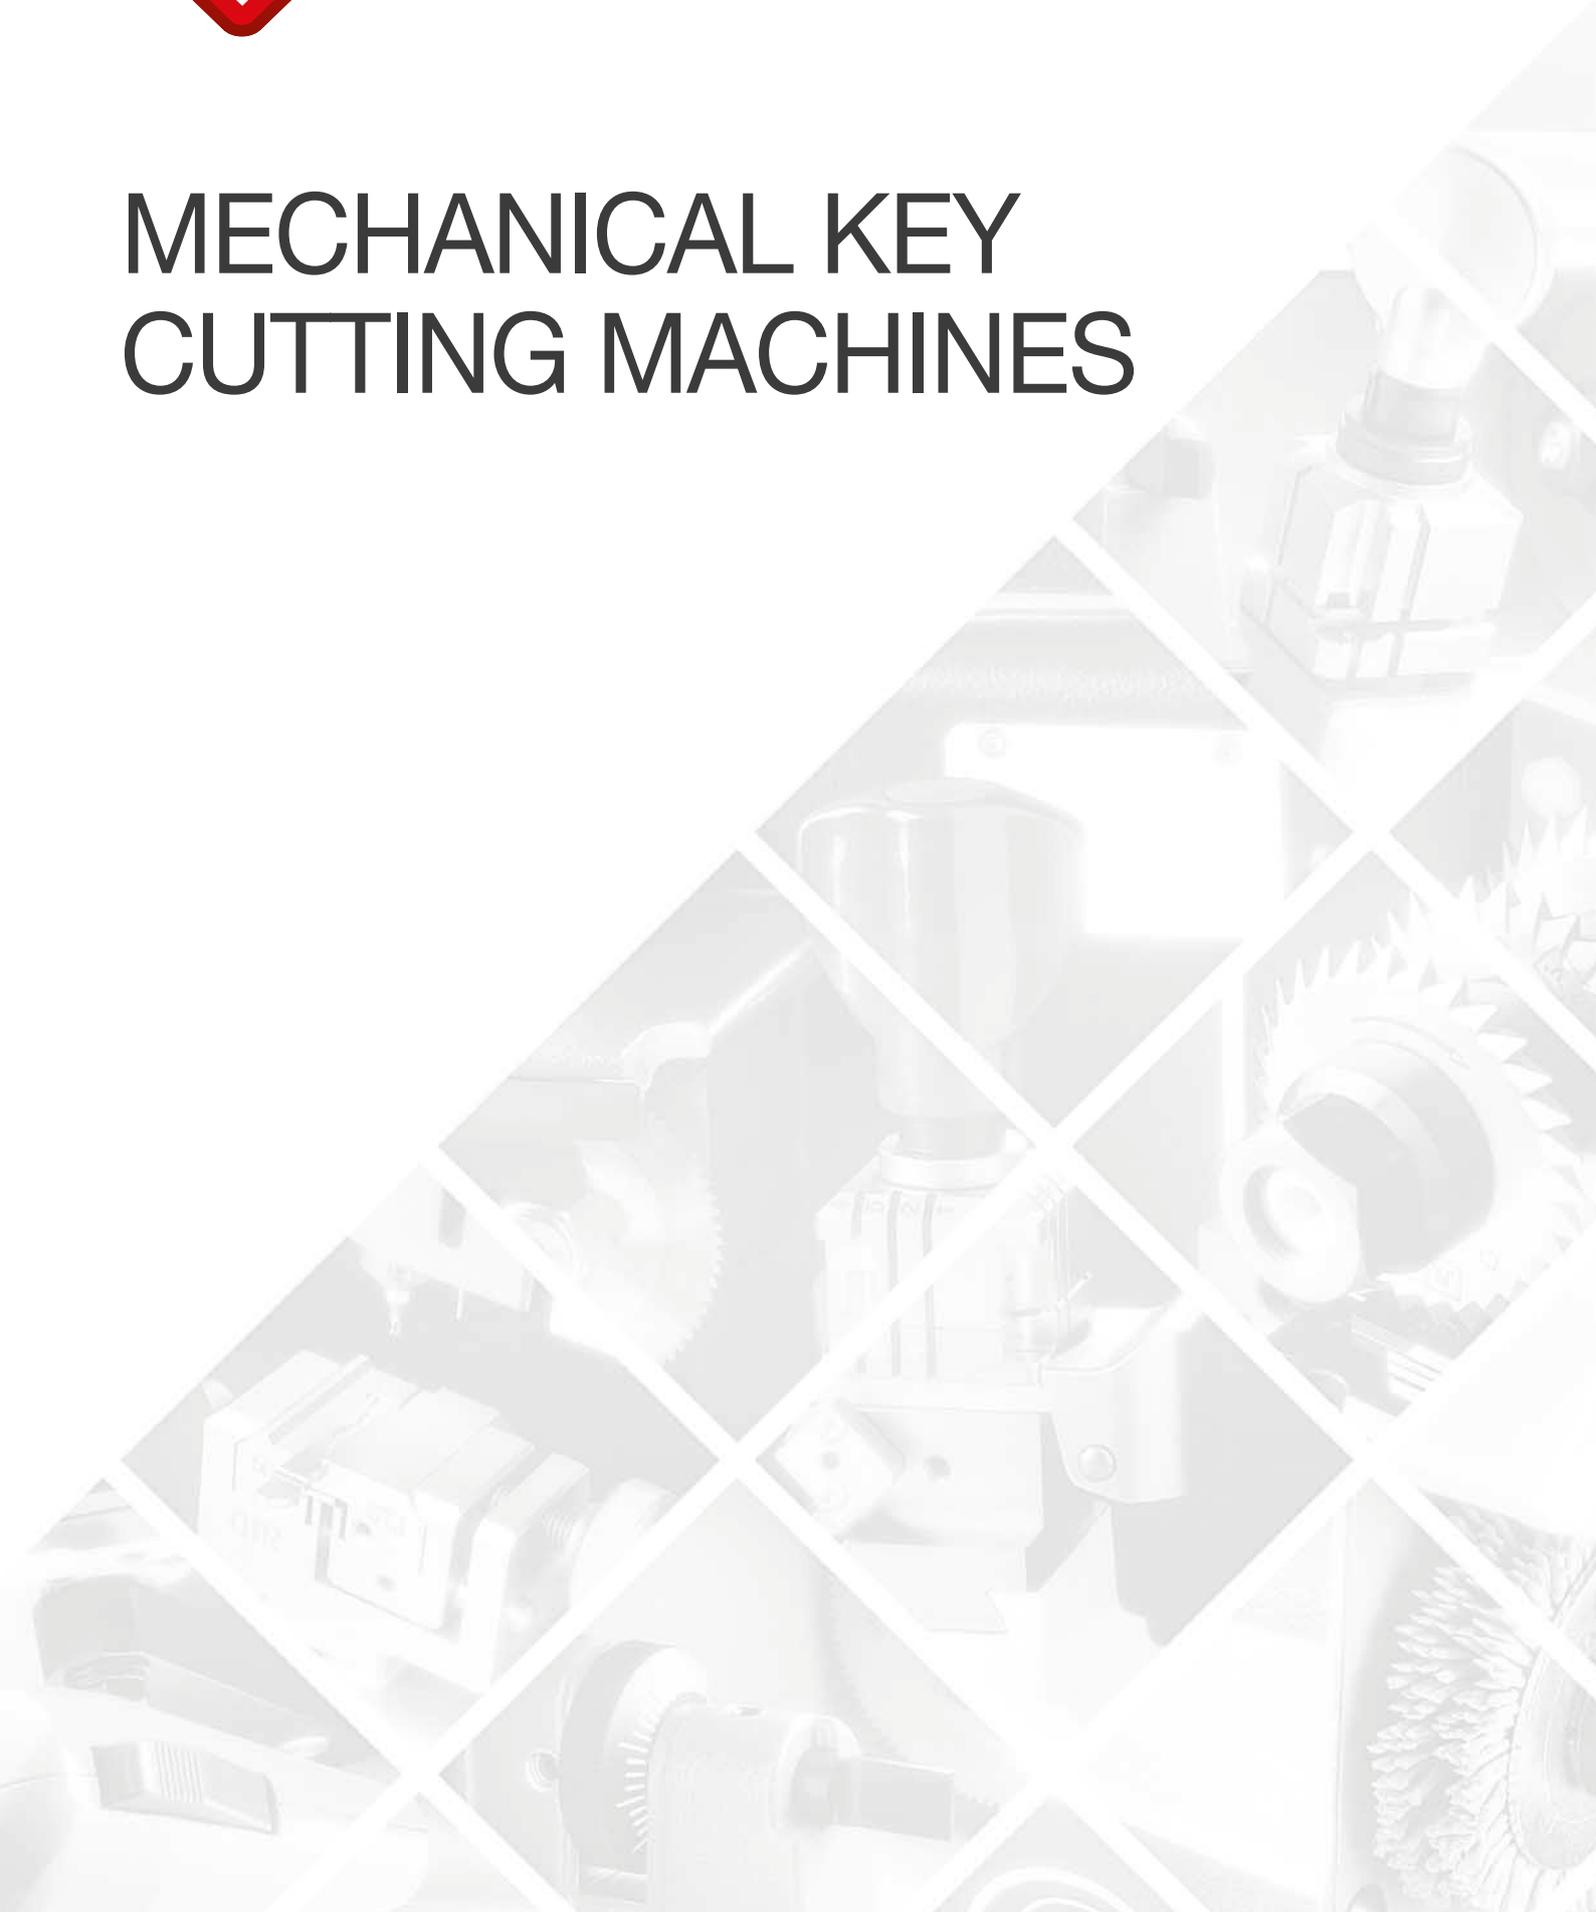

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry, no matter how small, should be recorded to ensure the integrity of the financial data. This includes not only sales and purchases but also expenses and income. The document provides a detailed list of items that should be tracked, such as inventory levels, supplier payments, and customer orders. It also outlines the procedures for recording these transactions, including the use of specific forms and the assignment of responsibilities to different staff members.

The second part of the document focuses on the analysis of the recorded data. It describes various methods for identifying trends and anomalies in the financial performance. This includes comparing current data with historical trends, as well as benchmarking against industry standards. The document also discusses the importance of regular reviews and audits to ensure that the records are accurate and up-to-date. It provides a step-by-step guide for conducting these reviews, from the initial data collection to the final reporting and analysis.

The final part of the document addresses the overall management of the financial records. It discusses the importance of maintaining a clear and organized system for storing and retrieving the data. This includes the use of physical and digital filing systems, as well as the implementation of security measures to protect the information. The document also provides a checklist of key tasks and responsibilities for the financial records manager, ensuring that all aspects of the system are properly maintained and updated.

MECHANICAL KEY CUTTING MACHINES

BRAVO

FOR FLAT, VEHICLE AND CRUCIFORM KEYS

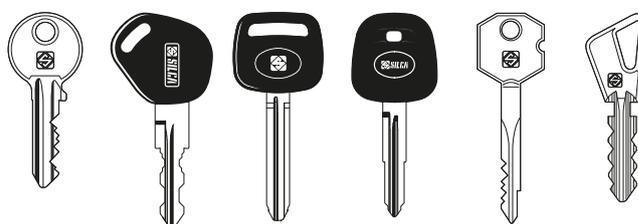

- High quality and versatile clamps
- Carriage safety system
- Automatically activated cutter
- Automatic tightening of the belt
- Electromagnetic safety switch
- Long-lasting components

MODELS:

Bravo Professional	Bravo W-Max
Bravo Evolution	Bravo Sofer 2P
Bravo Bd Évolution	Bravo D12
Bravo Maxima	
Bravo Maxima Plus	

KEY TYPES

Engraving of keys and medals

FUTURA AUTO

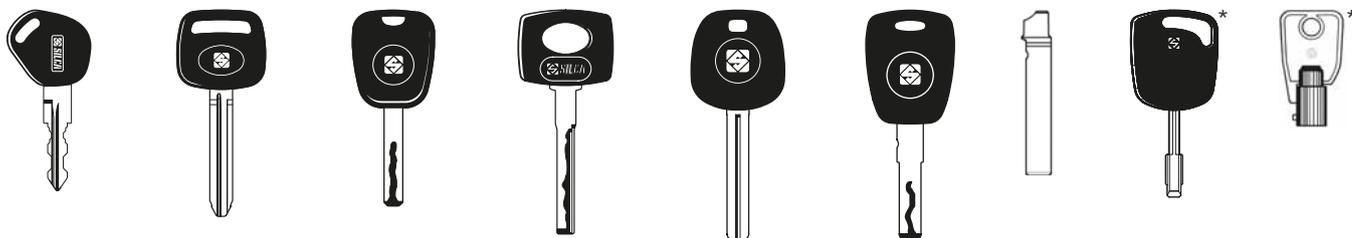

FOR AUTOMOTIVE KEYS

SINGLE cutting station

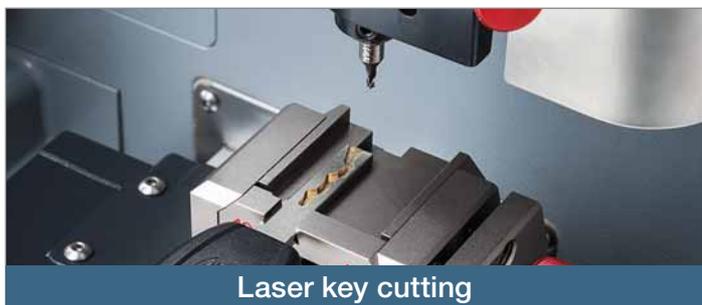

- Developed especially for the automotive business
- Cuts all types of vehicle keys
- Four-sided clamp with patented rotating system
- Optimized cutting cycles
- Decoding by electric contact
- Interchangeable clamps
- Clamp for flat keys
- Clamp for laser keys
- Patented tablet support
- Software-guided duplicating procedures
- Optional accessories available for Tibbe® and Simplex® keys

FUTURA AUTO KEY TYPES

* Can be duplicated with dedicated optional accessories

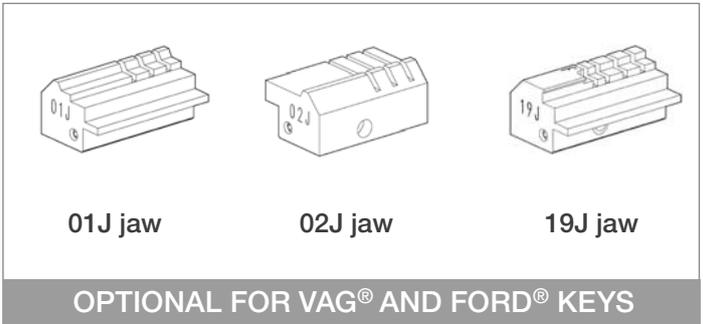

Patented
tablet support

Futura Auto Software

- Fast key search function
- “Partial cuts” function to identify the correct key cuts
- Key cut preview
- Compatible with InstaCode
- Integrated key hook position
- Easy to update

Key cut on the back

01J jaw 02J jaw 19J jaw

OPTIONAL FOR VAG® AND FORD® KEYS

03R clamp for Ford® keys

02R clamp for tubular keys

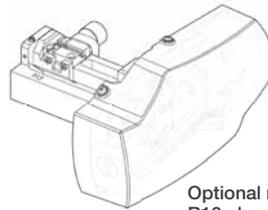

TRIAX PRO

FOR LASER AND DIMPLE KEYS, AND ENGRAVING

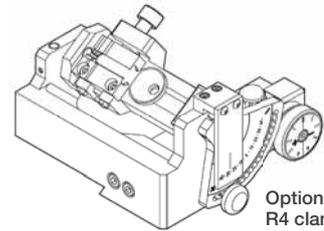

- Top performance, precision and quality
- Long-lasting components made of nickel-plated and stainless steel
- Cut keys counter for each cutter
- Easy-change jaws
- Quick-release cutter change system
- Weight kg 51,5

OPTIONAL CLAMPS FOR ANGLED CUTS

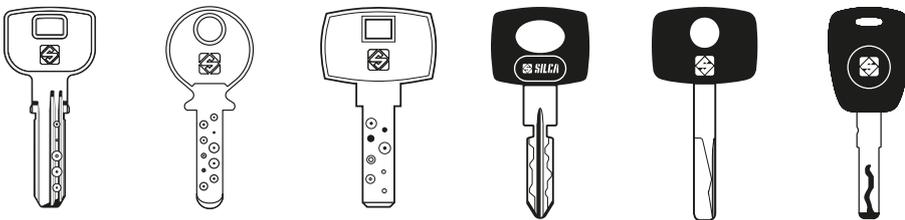

Optional motorized R13 clamp

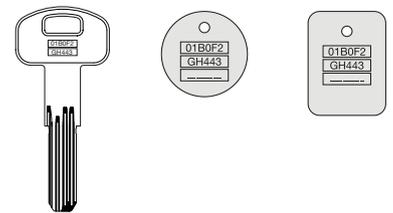

Optional manual R4 clamp

FUTURA PRO ONE

FOR LASER AND DIMPLE KEYS

SINGLE
cutting
station

- Lightweight and compact
- Long-lasting components
- Highly reliable
- Tablet supplied
- Fast cutting cycle
- Single cutting station
- Interchangeable jaws
- Wide range of optional accessories
- Integrated cutter holder
- 2 USB ports
- Wi-Fi connection
- Weight kg 17

KEY TYPES

* Can be duplicated with dedicated optional accessories

Integrated cutter holder

Laser key cutting

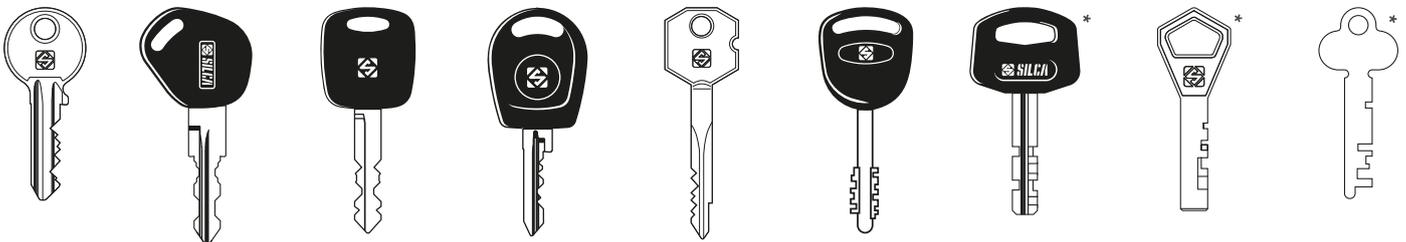

UNOCODE PRO

FOR FLAT, VEHICLE AND CRUCIFORM KEYS

- Top performance, precision and quality
- Widia cutter with AlCrN coating
- Patented laser decoder
- Patented dynamometric clamp knob
- Double clamp for copy by original and decoding
- Patented clamp blocking system
- Customisable speed of carriage movements
- Can be used in Stand Alone or with the Silca Code Program
- Various optional clamps and adapter ● Weight kg 38

FUTURA EDGE

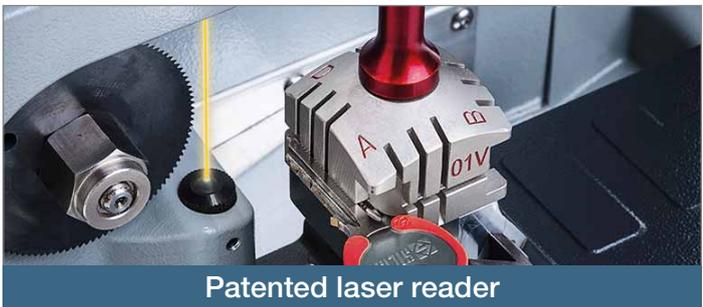

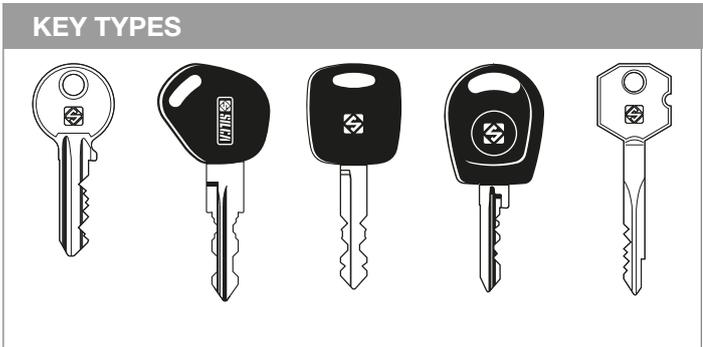

FOR FLAT, VEHICLE AND CRUCIFORM KEYS

SINGLE cutting station

- Lightweight and compact
- Highly reliable
- Patented laser reader
- Tablet supplied
- Fast cutting cycle
- Wi-Fi connection
- Long-lasting components
- Single cutting station
- Weight kg 16

UNOCODE 399 PLUS

FOR FLAT KEYS WITH METAL HEAD

- Perfect for duplicating large quantities of keys and master key systems
- Accessible wide working area
- Pneumatic feeder with high production rates
- Sorter set (FIFO) for key collection (optional)
- Key stacker with high loading capacity (optional)
- Swarf vacuum system (optional)
- External device with start/stop push button
- Can be used in Stand Alone or with the Silca Code Program
- .DAT file management for master key systems
- Weight kg 51

KEY TYPES

Wide graphic display

Wide cutter with AlCrN coating

UNOCODE 299

FOR FLAT, VEHICLE AND CRUCIFORM KEYS

- Solid, precise and high quality
- Simple and guided clamp calibration
- Wide database of residential and vehicle keys
- 4-sided clamp for flat keys
- Blank key detection by electric contact
- Accessible wide working area
- Duplication by code only
- Can be used in Stand Alone or with the Silca Code Program
- Patented clamp blocking system
- Weight kg 34,5

KEY TYPES

* Can be duplicated with dedicated optional accessories

Slotted clamp for vehicle keys

Keypad

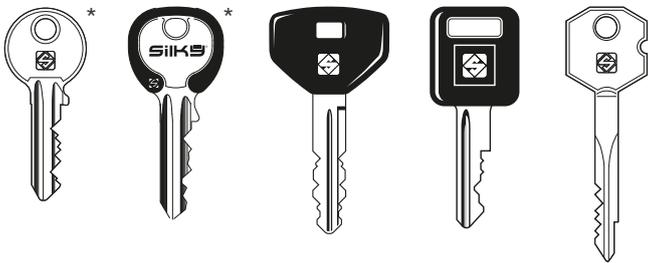

UC199

FOR FLAT, VEHICLE AND CRUCIFORM KEYS

- Slotted, 4-sided clamp for single and double sided keys
- Patented laser reader for flat keys
- Flat keys copied by original in one single operation
- Double clamp for copy by original and decoding
- Recognition of installed clamp
- Can be used in Stand Alone or with the Silca Code Program
- Optional: automatic feeder set (no compressed air needed)
- Movable safety shield
- Weight kg 43

KEY TYPES

* Use with automatic feeder

OPTIONAL

Automatic key feeder

Frontal start-stop button

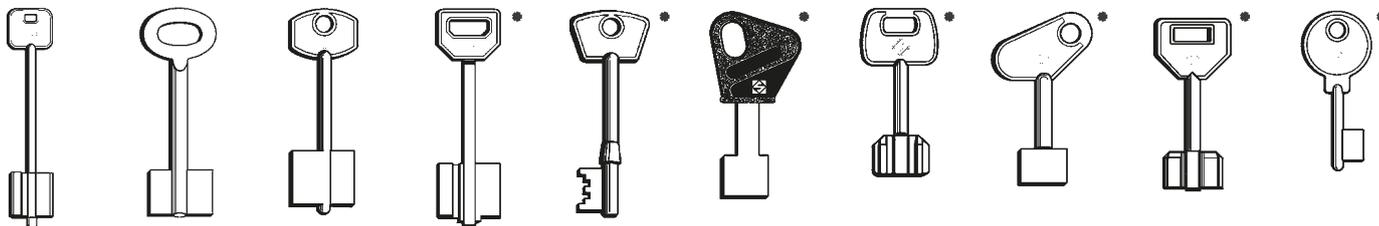

Cutter side clamp

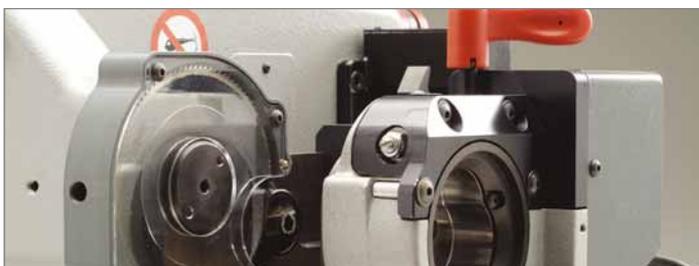

- Precise results when cutting steel and brass keys
- 360° rotating clamp, compatible with many optional accessories
- Blank key detection by electric contact
- Various optional tools for pump keys, central stop keys and others
- Patented laser decoder
- Duplicates by original, by decoding and by copy
- Stand-Alone use or with Silca Idea Program
- Job queue management via PC
- Weight kg 43

KEY TYPES

* Can be duplicated with dedicated optional accessories
